SUMMARY

Full Stack Software Developer with a Computer Science background and 4+ years of Freelance Experience. I specialize in ReactJS, Ruby on Rails with Postgres, and Nodejs. Looking to work on innovative ideas in a growth environment using the latest technologies to grow my skills and expertise and learn from other developers.

EXPERIENCE

MICROVERSE, *Remote*
Mentor (Volunteer), FEB, 2022 – Till Date
- Mentoring junior web developers, providing technical support through code reviews.
- Proposing improvements to code organization to improve code quality and overall performance.
- Providing advice and tips on maintaining motivation and longevity in the program.

BaseAfrique, Lagos, Nigeria
Software Engineer, June 2019 – December 2021
- Developed New Enterprise Software and implemented new features.
- Effectively deployed solutions on servers within the organization's network.
- Troubleshoot problems, debugged, and corrected service and application issues.

Nouveau Riche Media Technologies LTD, Lagos, Nigeria
Intern, November 2018–April 2019
- Worked closely with designers to recreate front-end designs with HTML and CSS (SCSS) to soothe design mockups and prototypes
- Participated in the definition of crucial scenarios, use cases, and end-user experience.

EDUCATION

MICROVERSE, Jan 2022 - August 2022
Remote Full-stack Web Development Program, Full Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing coding projects including front-end, back-end, and full-stack projects using Ruby on Rails, JavaScript, React, HTML, and CSS -- and included unit testing when applicable.
- Full-time program that required work across time zones while pair-programming with other software engineers worldwide.
- Leveraged Agile methodologies requiring excellent communication skills to share project status updates, plan daily workflow, create solid documentation, and attend daily standups.
- Developed skills in remote pair-programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

NIIT NIGERIA, Jan 2017 - 2018
Diploma in Java Enterprises Apps with DevOps, Full time.
- Creating software engineering professionals in Java Technologies.

SKILLS

Front-End: JavaScript, React, Redux, Bootstrap, HTML5, CSS3, WordPress.

Back-end: Ruby on Rails, MySQL, Postgres, MongoDB, Node.js.

Tools & Methods: Git, GitHub, Heroku, Netlify, TDD, Chrome Dev Tools.

Soft skills: Pair-programming, Remote development, Deadlines, Mentoring, Teamwork.

Testing: Jest, Capybara, RSpec.

PROJECTS

Book_flight
- This is a web application where you can manage, reserve, and manage your flight online.
- Built with (React, Ruby on Rails, and Postgres)

Math-magicians
- It is a Single Page App (SPA) that allows users to make simple calculations and read random math-related quotes.
- Built with (React, React-router)

Space-Travelers-Hub
- The web application provides commercial and scientific space travel services. The application will allow users to book rockets and join selected space missions using accurate live data from the SpaceX API.
- Built with (React, and React-router)

Budget-App
- This is a mobile web application where you can manage your budget by having a list of transactions associated

- Spent 1300+ hours mastering, RDMS Essential & T-SQL Programming, Programming in JAVA, HTML 5 and Responsive Web Design, Developing Web Applications using Servlets & JSP, Implementing JSF, Hibernate and Springs in J2EE Applications, GIT & GITHUB, Testing with JUNIT, and DevOps
- Developed skills in remote pair-programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

with a category so you can see how much money you spent and on what item you spent your money.
- Built with (Ruby on Rails, and Postgres)
